Progress made:

Made our team presentation, did our presentation, team contract…. not much else

Design questions:

Overall idea: good scope? Do we think this is the right size project?

Are our purposes adequate? DNJ had a lot of opinions on purposes in lecture, and we were just wondering whether you thought our purposes (in presentations) were good

TA opinions on challenges:

Map or Screenshot? Opinions? We were planning on screenshot. Talk about pluses and minuses. Leaflet another possibility, google maps yet another

How detailed to make our design doc? There are some things we won't know what is best until we implement.

What we plan to do over the next week:

Make our design doc, teamwork plan
